

# MPA-Quality Producer Certificate

MPA-Hannover, accredited laboratory for the testing of grinding tools, has certified the production of

## ANDRE ABRASIVE ARTICLES

ul. Przemyslowa 10

PL-62-600 Kolo

Scope of certification

The named manufacturer is complying with MPA's requirements recorded in the surveillance contract between the manufacturer and MPA which comprises among others:

The manufacturer has agreed to unannounced surveillances of the production twice a year.

In addition samples are to be taken and tested in MPA's laboratory. All initial tested tools have fulfilled the safety regulations according to EN 12413 "Safety requirements for bonded abrasive products".

Consequently the manufacturer is allowed to mark grinding wheels and cutting-off wheels which are manufactured in the above plant and which satisfy the requirements of EN 12413 - based on the registered test results - with the quality mark:

**MPA QP 4810**

This certificate was first issued on 6 December 2007 and will expire on 5 December 2012.
